

▶ Jiuwu Hi-Tech company profile

Established in 1997 and listed on the A-share GEM of Shenzhen Stock Exchange (300631. SZ) in March 2017, Jiangsu Jiuwu Hi-Tech Co., Ltd. (hereinafter referred to as Jiuwu Hi-Tech) is one of the first batch of recognized national high-tech enterprises, national specialized and new "little giant" enterprises, national single champion in manufacturing industry, and leading enterprise in ceramic membrane field of China's membrane industry. It has won four National Science and Technology Progress Awards, one the State Technological Innovation Award, and China Patent Excellence Award.

Jiuwu Hi-Tech is a high-tech enterprise born to achieve domestic substitution of ceramic membrane products. In 1997, relying on the technical strength of Nanjing University of Technology, it successfully developed and produced China's first independent ceramic membrane, It is known as the "pioneer of Chinese ceramic membrane".

▶ Tibet Jiuwu company profile

Global leader in lithium adsorbent production capacity and performance

To implement the requirements proposed by General Secretary Xi Jinping, which emphasize leveraging the unique resource endowment of the plateau, actively fostering emerging industries, accelerating the construction of a world-class salt lake industrial base, and creating a national highland for clean energy industries. Jiuwu Hi-Tech actively leverages its strengths and established Tibet Jiuwu New Material Technology Company (referred to Tibet Jiuwu) in 2022.

As a key enterprise introduced to the Tibet Autonomous Region's Tibet Qing Industrial Park, Tibet Jiuwu has continuously strengthened its investment in research and development, optimized product performance, and has always maintained its technological strength at the international leading level in the field of lithium adsorbents. While injecting new vitality into regional economic development, Jiuwu also provides high-performance lithium adsorption solutions to global customers.

Construction investment amount

Plant area

Aluminum based lithium adsorbent

Titanium based lithium adsorbent

Innovation-driven leadership leads to high-quality development

Since its establishment, Tibet Jiuwu has been dedicated to the research, development and production of lithium adsorbent products and has currently applied for dozens of patents.

Jiuwu Hi-Tech company profile

Choose stronger adsorption capacity and wider application range

- High adsorption capacity
- High adsorption efficiency
- High cycle life
- High selectivity

Aluminum based lithium adsorbent

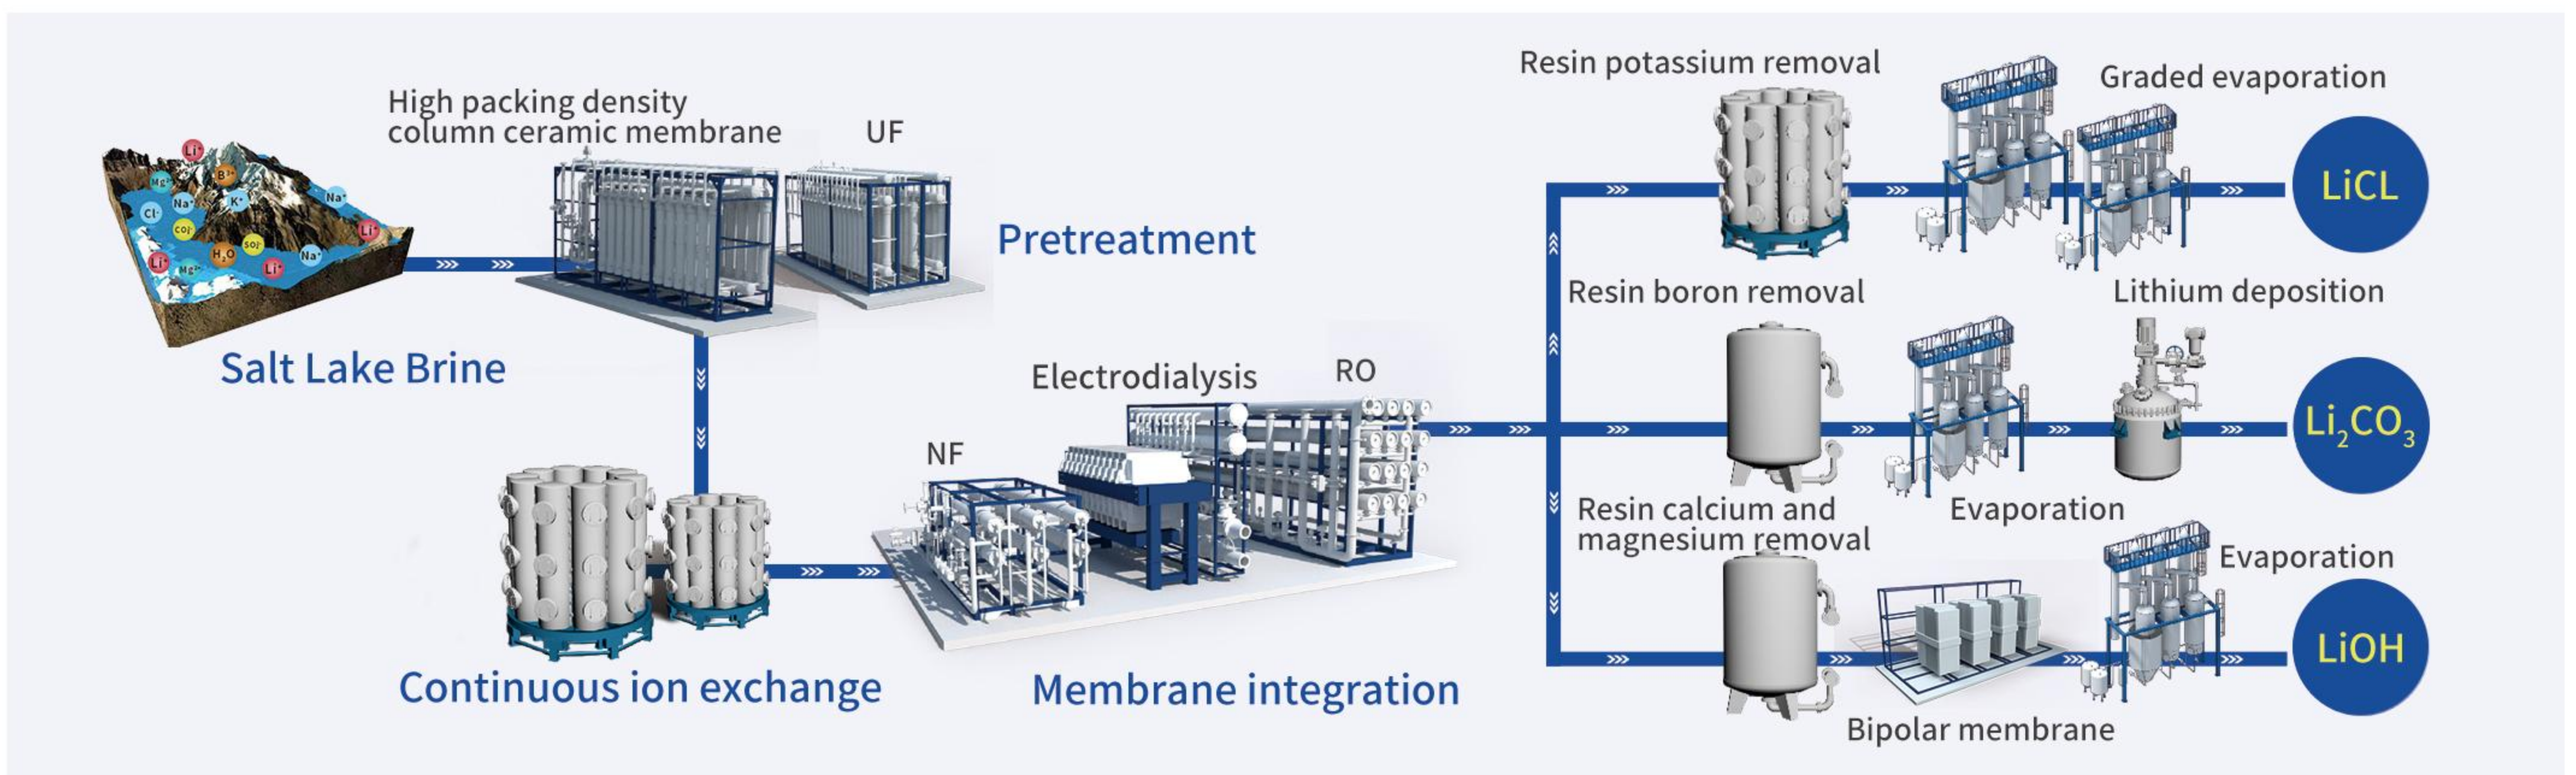

- Lithium extraction from various types of salt lakes
- Extracting lithium from salt mother liquor
- Extracting lithium from deep underground brine
- Lithium extraction from associated brine in oil fields

Qinghai Salt Lake and Xizang Neutral Salt Lake
Xinjiang Salt Lake, South American Salt Lake

Aluminum based lithium adsorbent

- Lithium extraction from alkaline salt lakes in Xizang
- Lithium recovery from lithium deposition mother liquor
- Lithium battery disassembly
- Waste liquid lithium recovery
- Lithium recovery from other alkaline waste liquids
